What's Magento 2 Portfolio?

Magenuts Portfolio Magento 2 extension helps you to showcase your services, and work on your store easily. Grab the users attention with this extension and let your work speak for you. Magenuts Portfolio Extension for Magento 2 will help you to easily add and show your portfolio on your store. If you have the projects that use the products of your shop and you want to present it in your shop, you can use this extension to let your portfolio speak for you. This extension mostly used when you want to showcase the most satisfying services you completed to your customers/visitors.

Key Features

- Very easy to install even beginner can install and use it.
- Fully Responsive.
- Show your services to grow your business.
- Show your portfolio category wise.

Important Notes and Requirements

1. Requirements: **Magento Community 2.1.x up-to 2.4.3, Magento Enterprises (2.1.x to latest).**
2. Server Side Requirements: *MySQL 5.0 and above PHP 7.1.6 and above.*
3. All functionality is fully tested on Magento Community Edition 2.2.2 and will be compatible with Editions from 2.1.x up to 2.4.3.
4. **Magento Enterprises Edition is also supported but not tested.**
5. **For your safety related to any damage or loss to your store, its strongly recommended to you that take backup first.**

Installation

1. Unpack the extension ZIP file on your computer.
2. Connect to your website source folder with FTP/SFTP/SSH client and **upload all** the files and folders from the extension package to the corresponding **root folder** of your Magento 2.x installation:

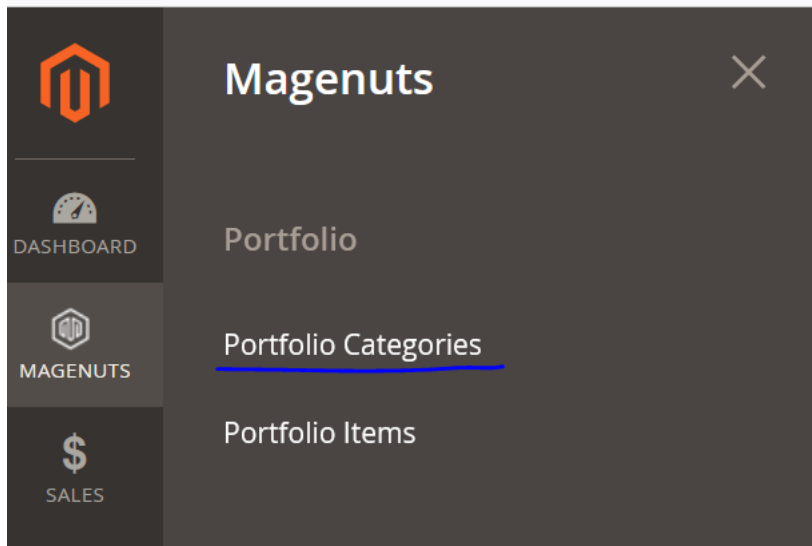

Please use the “**Merge**” upload mode. Do not replace the whole folders, but merge them. This way your FTP/SFTP client will only add new files. This mode is used by default by most of FTP/SFTP clients software. For MacOS it’s recommended to use Transmit. If you install several extensions from Amasty, they will contain same files from the Base package — feel free to overwrite them, these are system files used by all our extensions.

3. Connect to your Magento directory with SSH.
4. Run the following 3 commands:
 - a. `php bin/magento setup:upgrade`
 - b. `php bin/magento setup:static-content:deploy`
 - c. `php bin/magento setup:di:compile`

Portfolio Category Grid

Click at Magenuts Menu in the admin panel and then click Portfolio Category as see in the following picture.
